

# Ripon Grammar School

*Helping shape the future since 1555*

Re-founded 1555

Tuesday 4<sup>th</sup> September 2018

Dear parents of 2<sup>nd</sup> Form pupils,

## **Re: Supporting learning in mathematics**

I am writing to explain how your child can support their learning in mathematics through the school's virtual learning environment, SharePoint.

### **Logging on to SharePoint**

Go to the school's website (<http://www.ripongrammar.co.uk/>) and then choose **HOME ACCESS** from the bottom left of the page (you will probably need to scroll down). It may be necessary to download some software and then your child will need to enter their login details.

If your child has difficulty logging on to SharePoint, please ask them to go directly to IT support, which is housed in the bottom floor of the Sani building.

### **Scheme of work**

The **Mathematics Scheme of Work** can be accessed from the home **Maths** page of SharePoint. I suggest that pupils download a copy for future reference.

A scheme of work tells teachers what topics to teach, when to teach them and roughly how long to spend on them. Naturally, a teacher may choose to teach the material in a slightly different order and at a slightly different pace according to the group they are teaching.

From the **Contents** tab, all schemes of work can be accessed so that later academic years can go back to revise previous material if they need to do so. Second Form pupils need to choose the **Y8 scheme of work** link or the **Y8** worksheet tab at the bottom.

Each scheme of work is set out lesson by lesson, **with clear textbook details**, and each lesson usually has an **e-lesson** attached to it for further reference.

The **Y8 learning objectives** link (**Y8 LO** worksheet tab at the bottom) clearly states what needs to be learnt for each topic and is a useful reference when revising.

### **Year 8 page on SharePoint**

The **Year 8** page on SharePoint accompanies the course topic-by-topic throughout the academic year. Each topic includes:

**TB:** the textbook unit which pupils may use in class and from which **homework may be set**. It includes **explanations prior to each exercise** which will help pupils should they become stuck.

**Extra:** a set of extra exercises for each topic to give pupils **extra practice** should they need it. This will prove especially **useful when revising** for topic tests and examinations. **Answers are provided** at the end of the document.

**Activities:** a collection of investigational-type tasks that teachers may set for homework as a means to get pupils thinking about a topic before they start it or as a means of reinforcing a topic after it is completed.

**E-lessons:** links that provide **explanations, example questions and exercises** for pupils to complete. The exercises are **self-marking** so pupils can immediately gauge their understanding of the material. Again these will prove very useful when revising.

**Examinations:** as requested by parents, last year's November, March and June (end of year) examinations will be placed on SharePoint in order to aid pupils' revision.

## Maths Challenge page on SharePoint

From the **Maths** page on SharePoint, clicking on the **Maths Challenge** link takes you to the UKMT page where we house some of our **extension material**. Teachers may set these as exercises for homework or do them in class. However, there is nothing stopping a pupil from doing them at home and then asking their teacher for the answers.

### **Junior – 1<sup>st</sup> and 2<sup>nd</sup> Form**

Intermediate – 3<sup>rd</sup>, 4<sup>th</sup> and 5<sup>th</sup> Form

Senior – Lower 6<sup>th</sup> and Upper 6<sup>th</sup>

After completing the sheets for 1<sup>st</sup> and 2<sup>nd</sup> Form, a pupil may wish to ask their teacher for the UKMT mentoring material – but be warned, this is not for the faint hearted.

If there is no access to SharePoint at home, a pupil can use the computers at school to get hold of the material. Of course, in addition to the above, pupils can always seek support from their teacher should they reach an immovable point. We hope you find what is detailed above useful as your child studies mathematics at Ripon Grammar School.

Yours sincerely,

Neil White, on behalf of the Mathematics department  
Head of Mathematics
